TYRES FOR THE LONG HAUL

HAULMAX

HAULMAX 11R22.5 ATT101 400,000KMS - NOT OUT

PAUL BEGGS OF NYAH WEST VICTORIA
OWNER OPERATOR

APPLICATION - REAR AXLE - B TRAILER

In 2009 Paul Beggs of Nyah West went looking for a heavy duty high performing trailer tyre to replace the Japanese manufactured original equipment tyres fitted to his new B Double trailer. His original tyres had under performed both in kms achieved and even wearing.

After visiting his local authorised HAULMAX dealer and discussing his high demands and extreme loads Paul fitted 4 x HAULMAX 11R22.5 ATT101 to the rear of his B Trailer to trial.

Paul's B Double has a high mass management rating allowing him to carrying an average pay load of 45 tonnes. Paul's vehicles travel in all conditions throughout South Australia / Victoria & the Eastern Sea Board.

At first Paul was very sceptical about trialing the HAULMAX product as nearly all other major brands in the past had failed to live up to expectations. His local HAULMAX dealer new that the ATT101 would perform where all other brands in the past had failed. The ATT101's heavy duty construction, pattern design and superior casing strength ensure even wear and maximum life in most applications.

2 years and 400,000Kms later Paul couldn't be happier. "In the past I have struggled to find any tyre that would manage to do half the kms in this application. And they are still going"

Based on a cost per kilometre the HAULMAX TYRES are in a league of their own and the only choice for Paul and his fleet.

The outstanding savings by using HAULMAX TRUCK Tyres means more profits for Paul and any other Fleet choosing the HAULMAX BRAND.
